Spinoza Global Assets Strategy Fund

SPINOZA CAPITAL

Fund Fact Sheet • 31 Oct 2026 • Net Asset Value: € 192.39

Investment strategy

The Fund pursues long-term capital appreciation by investing in equities, equity-related securities and derivatives (e.g. financial contracts whose value depends on an underlying asset, index or rate), bonds and other listed securities on a global basis.

The investment concept is based on Ben Graham's investment philosophy on market fluctuations as set out in 'The Intelligent Investor' adopted through a proprietary, rules based asset allocation model: equity exposure is dynamically increased when markets fall and decreased when markets rise relative to their estimated intrinsic value.

The investment concept is designed to capitalise on the long-term appreciation of equities while taking advantage of short and mid term market overreactions, in fact benefiting precisely from what investors are usually most afraid of: volatility.

The Fund aims to generate attractive risk-adjusted returns (e.g. returns measured relative to the level of risk taken). The Fund is actively managed and is not managed in reference to any benchmark index.

Key information

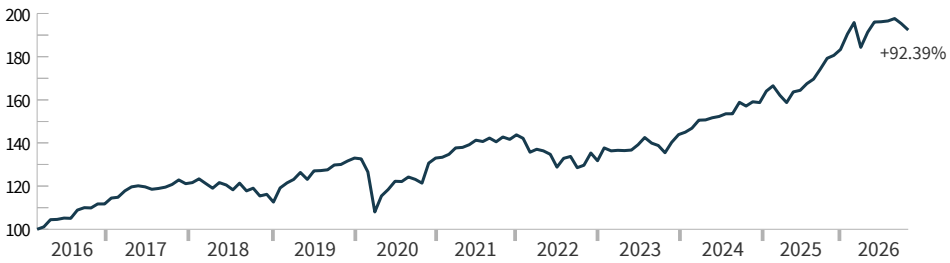

ISIN	LU1923620329
WKN	A2P967
Fund category	Balanced Fund, global
Domicile	Luxembourg
Fund currency	EUR
Fund inception	1 February 2016
Income type	Accumulating
Fund type	UCITS
Distribution	Germany, Luxembourg
Dealing days	Daily
Minimum investment	EUR 1'000
Financial year end	31 December
Minimum equity participation rate	25%
Management company	Gen II Management Company (Luxembourg) SARL
Investment manager	Spinoza Capital GmbH
Administrator	CACEIS Bank, Luxembourg Branch
Depositary	CACEIS Bank, Luxembourg Branch
Auditor	KPMG Luxembourg

Fees and expenses

Subscription fee	0%
Ongoing charges which includes a Management fee of	1.24% p.a. 0.75% p.a.
Performance fee (perpetual high watermark, see prospectus for details)	up to 7.5%
Redemption fee	0%

Performance

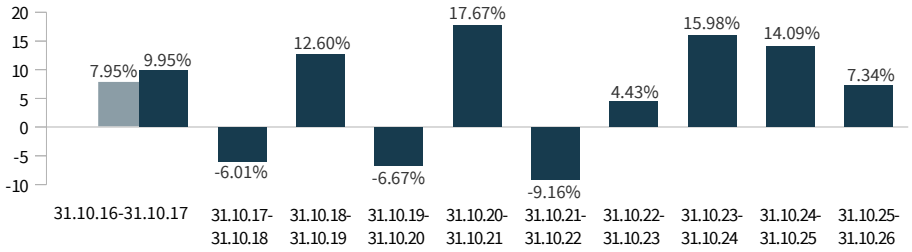

Development of Net Asset Value in EUR since fund inception (Gross)[1]

Cumulative Performance in EUR (Gross, in %)[1]

	1 month	3 months	Year to Date	1 year	3 years	5 years	since inception
Fund	-1.54%	-2.13%	4.91%	7.34%	42.03%	34.74%	92.39%

Annual Performance in EUR (in %)[1]

Fund performance (net) including maximum subscription charge of 2%

Fund performance (gross)

Gross fund performance takes into account all costs & fees incurred at fund level but excludes any subscription fees. Further costs may be charged individually at customer level (e.g. custody fees, commissions and other charges), resulting in a diminishing effect on performance. The level of custody fees can be found in your bank's schedule of fees.

Fund manager's comment: October 2026

- Global equity markets fell in October, but the headline returns masked significant divergences beneath the surface. While developed markets saw moderate slippage (e.g. S&P 500 Index -0.9%; Euro Stoxx 50 Index -2.2%), a sharp sell-off in emerging markets and technology companies exposed to AI drove global equities lower (e.g. Nasdaq Index -6.7%). Growing scrutiny over whether substantial investment in AI infrastructure would generate sufficient returns weighed on technology-related companies. Meanwhile, higher financing costs and rising credit spreads put pressure on the more highly leveraged parts of the ecosystem, such as neocloud providers. Weakness in emerging markets was concentrated in Asia and Latin America, with the MSCI Emerging Markets Index falling by 8.1% last month. While concerns about the scale of AI investments affected technology-focused Asian markets (e.g. Korea, Taiwan and Japan), Latin America experienced a politically driven sell-off. The unexpected presidential election victory of left-wing Lula resulted in a sharp sell-off of Brazilian equities (MSCI Brazil Index -12.1%).

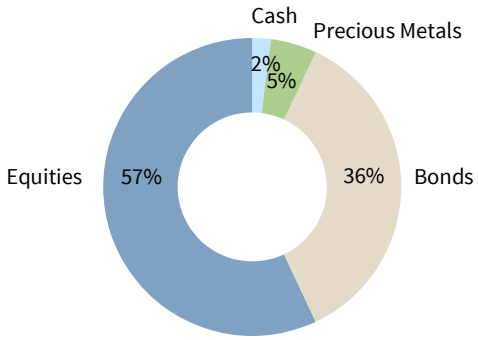

- Against this backdrop of volatility, government bonds provided an important counterweight as investors sought out safer assets. As bond yields fell back from their highs in September, developed bond markets moved modestly higher. Ten-year government bond yields fell by 30–40 basis points in October. The ten-year yield in Germany fell from 3.6% to 3.3%, while the yield in the US fell from 5.3% to 4.9%. Meanwhile, economic data proved resilient. The Composite Purchasing Managers' Index remained comfortably in expansion territory in both the US and Europe in October (56 and 52, respectively). US and eurozone GDP figures were robust for the third quarter, with the US economy growing by 3.4% and the eurozone expanding by 1.3%. Renewed tensions in the Middle East caused the price of Brent crude oil to rise from $103 to $118 per barrel in October.

- The Spinoza Global Assets Strategy Fund fell by 1.54% in October. The fund took advantage of price declines and lower valuations in selected equity markets around the world to increase its positions (e.g. Latin America, South Africa, Philippines). The Brazilian stock market, for example, fell by more than 25 per cent the day after Lula's election. The fund took advantage of this sharp intraday drop to add to its position. While political risks have undoubtedly increased following Lula's re-election, the Brazilian equity market offers an attractive return-to-risk profile with a P/E ratio of 7.5x. Furthermore, Brazilian assets have performed robustly overall over the last four years under Lula. As a result of these purchases, the fund's equity exposure remained broadly stable at 57% last month. The fund's bond holdings (36% of assets) contributed positively to performance last month, with the fund's long-dated government and supra-national bonds performing particularly well. The fund added to its positions in senior, AA-rated bonds issued by high-quality technology companies offering attractive risk-adjusted returns, and increased its bond holdings in currencies that offer a high inflation-adjusted carry relative to the euro (e.g. AUD, NOK, GBP). In its precious metals portfolio, the fund took advantage of significant falls in the prices of silver and platinum to add to its positions.

Investor Profile

The Fund is suitable for investors seeking long-term capital growth and may not be appropriate for investors who plan to withdraw their money within 5 years.

Risks

Market risk: Market fluctuations and general market or systematic risk is inherent to an entire investment market and as such, to a varying degree, in all of the Fund's investments. Price movements in an investment market can be volatile and are influenced, among other things, by changing market supply and demand, national and international political and economic events.

Concentration risk: To the extent that the Fund's investments are concentrated in a particular country, market, industry or asset class, the Fund may be susceptible to loss due to adverse occurrences affecting that country, market, industry or asset class.

Currency risk: The Fund's reference currency is EUR, whereas the underlying investments of the Fund are denominated in a variety of currencies. Consequently, the performance of the Fund may be influenced by movements in foreign exchange rates between EUR and the currencies in which the underlying investments are denominated.

Liquidity risk: The Fund may be exposed to liquidity risk where, due to a lack of marketability, the Fund's investments cannot be bought or sold quickly enough to prevent or minimize a loss.

Derivatives risk: The Fund may use derivatives in an attempt to reduce risk (hedging) or for investment and portfolio management purposes. It may be that the use of derivatives may not always be successful and cause unit prices to fluctuate which may in turn result in loss to the Fund.

Credit risk: The risk of default that may arise if an issuer fails to make payments when due.

Operational risk: The risk of losses caused by employees, delegates, service providers and other third parties through insolvency, errors, fraud or criminal actions.
